SITUATIONAL LEADERSHIP® II

INTRODUCING Situational Leadership® II LEADERSHIP WORKSHOP

Situational Leadership II is a 1 day professional development opportunity that is a strategic and effective method for managing and developing people. In this program you will learn a practical model and a set of tools that will help you:

- Have quality conversations about performance and development with employees
- Develop a self-reliance with your people that will empower them to address matters in a consistent manner
- Leverage competence and commitment of personnel and key leaders within the organization
- Build trust and enhance credibility for all in a leadership role
- Achieve greater productivity from your own team
- Provide tools to retain and train your most talented employees

“Situational Leadership II focuses on the fundamental changes and emerging roles of a leader today. It affords leaders increased opportunities to become partners with employees to begin discussion on the assessment and diagnosis of individual staff members and their own strengths and weaknesses. The program uses a variety of flexible leadership styles to meet the needs of individuals and collectively begin the discussions that assess performance based on mission, vision, roles and goals for all employees of the organization. Situational Leadership II facilitates a “partnering for performance” within the organization by increasing the frequency and quality of relevant communication with your staff.”

Jim Lahoski,
Situational Leadership II Facilitator
North Central Ohio ESC
